

10 Ready-to-Project Classroom Screen Routines

Essential Display Blueprints for Interactive Smart Boards

Published by MyClassScreen.org | Free Teacher Resource | 2026 Edition

TABLE OF CONTENTS & QUICK BLUEPRINTS:

1. Substitute Teacher Zero-Friction Handover Routine
2. CHAMPS Visual Classroom Expectations System
3. Morning Arrival & Do-Now Cognitive Hook Routine
4. Small Group Station Rotations & Time Choreography
5. Real-Time Voice Volume & Noise Meter Regulation
6. Independent Focused Reading & Writing Countdown
7. Math Workshop Lab Team Pairings (Instant Group Maker)
8. Equitable Formative Review (Random Name Picker & Wheel)
9. 3-Minute Exit Ticket & Form Submission Routine
10. End-of-Day Room Reset & Pack-Up Countdown

HOW TO PROJECT IN 3 SIMPLE STEPS:

Step 1: Open myclassscreen.org/board in your web browser.

Step 2: Add the widgets recommended for each period from the bottom dock.

Step 3: Press F11 for full-screen mode on Promethean, SMART Board, or ViewSonic.

No student accounts required. Audio stays local in your browser buffer.

ROUTINE 1: SUBSTITUTE TEACHER ZERO-FRICTION BOARD

Goal: Provide instant, familiar visual structure when a guest teacher runs the room.

Recommended Widgets: Full-Screen Clock + 5-Minute Transition Timer + Schedule Agenda

- Lock the schedule text box on the right side of the screen before leaving.
- Students reference the board rather than interrupting the guest teacher.

ROUTINE 2: CHAMPS VISUAL CLASSROOM EXPECTATIONS MATRIX

Goal: Clear behavior expectations for each phase without repeating verbal directions.

- Conversation: Noise Meter set to Level 1 Whisper (calibrated to 35dB).
- Help: Text box with rule: "Ask 2 desk peers before raising hand for teacher."
- Activity: Display explicit learning targets and milestone checkpoints.
- Movement: Traffic light set to Yellow (Movement requires teacher nod).
- Participation: Random Name Picker on screen for equitable cold-calling.

ROUTINE 3: MORNING MEETING & DO-NOW ARRIVAL SCREEN

Goal: Calm morning transitions and instant cognitive focus as students enter.

Recommended Widgets: 10-Minute Arrival Countdown + This or That Poll + Daily Calendar

- The visual poll gives students an instant cognitive hook and eliminates hallway delays.
- When the timer rings, transition immediately to whole-group greeting without shouting.

ROUTINE 4: TIMED STATION ROTATIONS & SMALL GROUPS

Recommended Widgets: 15-Minute Countdown Timer + Group Maker (4 Squads) + Chime

- Enable the 1-minute warning buzzer so students begin tidying before desk changes.
- Group Maker divides students fairly with zero arguments about partner favoritism.

ROUTINE 5: VOICE LEVEL SELF-REGULATION WITH NOISE METER

Recommended Widgets: Real-Time Sound Level Meter + Focus Stopwatch

- The meter displays green/amber/red indicators to let students self-regulate volume.
- Privacy Assurance: Microphone audio is processed strictly in your local browser buffer.

ROUTINES 6-10 SUMMARY BLUEPRINTS:

6. Independent Focus: Full-screen timer with soft nature wallpaper background.
7. Math Workshop: Rolling dice widget for mental math drills and probability.
8. Equitable Checks: Wheel Spinner or Name Picker for un-biased pop questions.
9. 3-Minute Exit Ticket: QR Code widget pointing to Google Forms or paper ticket prompt.
10. End-of-Day Dismissal: 7-minute visual bar countdown paired with chore checklist.
